DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 09/04/2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent 6,732,367 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 79-80, 85-86 and 91-92 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

3. Applicant's arguments filed 09/04/2008 have been fully considered but they are not persuasive.

Applicant argues on page 16 of Remarks dated on 09/04/2008 that the "restricted" message does not show or suggest applicants' claimed unobjectionable program listings information, where the unobjectionable program listings information for a program includes descriptive information for a channel, a package, or content of that program.

The Examiner respectfully disagrees with applicant's arguments. The unobjectionable program listings information for a program including descriptive information for a channel or content of that program is fairly broad thereafter the "restricted" message displayed for a specific channel or a content of that program reads into these claimed features.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2426

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 75-78, 81-84 and 87-90 are rejected under 35 U.S.C. 102(e) as being anticipated by Ellis et al (US 7,185,355).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding Claims 75, 81 and 87, Ellis discloses an interactive television program guide system (FIG.1) with corresponding method and computer-readable media (44; set-top box inherently includes memory) in which an interactive television program guide is implemented on user television equipment of a user (40), comprising:

means for providing program listings to the interactive television program guide (FIG.22), wherein at least some of the program listings contain potentially objectionable program listings information (FIG.7 element 106; Col 8 lines 60-67); and

means for replacing the potentially objectionable program listings information in the program listings with unobjectionable program listings information using the interactive television program guide so that when the interactive television program guide displays the program listings the unobjectionable program listings information is displayed in place of the potentially objectionable program listings information, wherein the unobjectionable program listings information for each of the programs includes descriptive information for a channel, a package, or content of that program (Col 15 lines 42-57; "restricted" message is a program listings descriptive information for a channel).

Regarding Claims 76-78, 82-84 and 88-90, Ellis further discloses the objectionable program listings information includes adult program titles, descriptions (FIG. 7, element 106; TV-MA rating movies inherently includes adult program titles and descriptions).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
